

## Use Case Explanations:

### Input Profile Information

- User inputs their name, address, email and phone number for the system to use later

### Begin Interview

- System outputs two rows of "\*\*\*\*\*" 's and tells the user that the interview is about to start and then two more rows of "\*\*\*\*\*" 's

### Read Questions

- User must be able to access and read the questions when asked

### Respond to Questions

- User inputs their answers/responses to the questions

### Receive Rating

- User is told whether or not they got the job

### Receive Feedback

- User sees exactly where in the conversation they excelled or failed
