I gave my program to a friend and asked him to try and get hired or asked for a second interview while still being rude, he succeeded which then told me that I needed to work on what certain people may input…so I had to change and add more words to what was in my Vulgar words. There were more severe cases of what needed to be put in, but I chose not to include that transcript because my friends were QUITE rude

I apologize in advance for the language…:
